

Crypto payment gateway

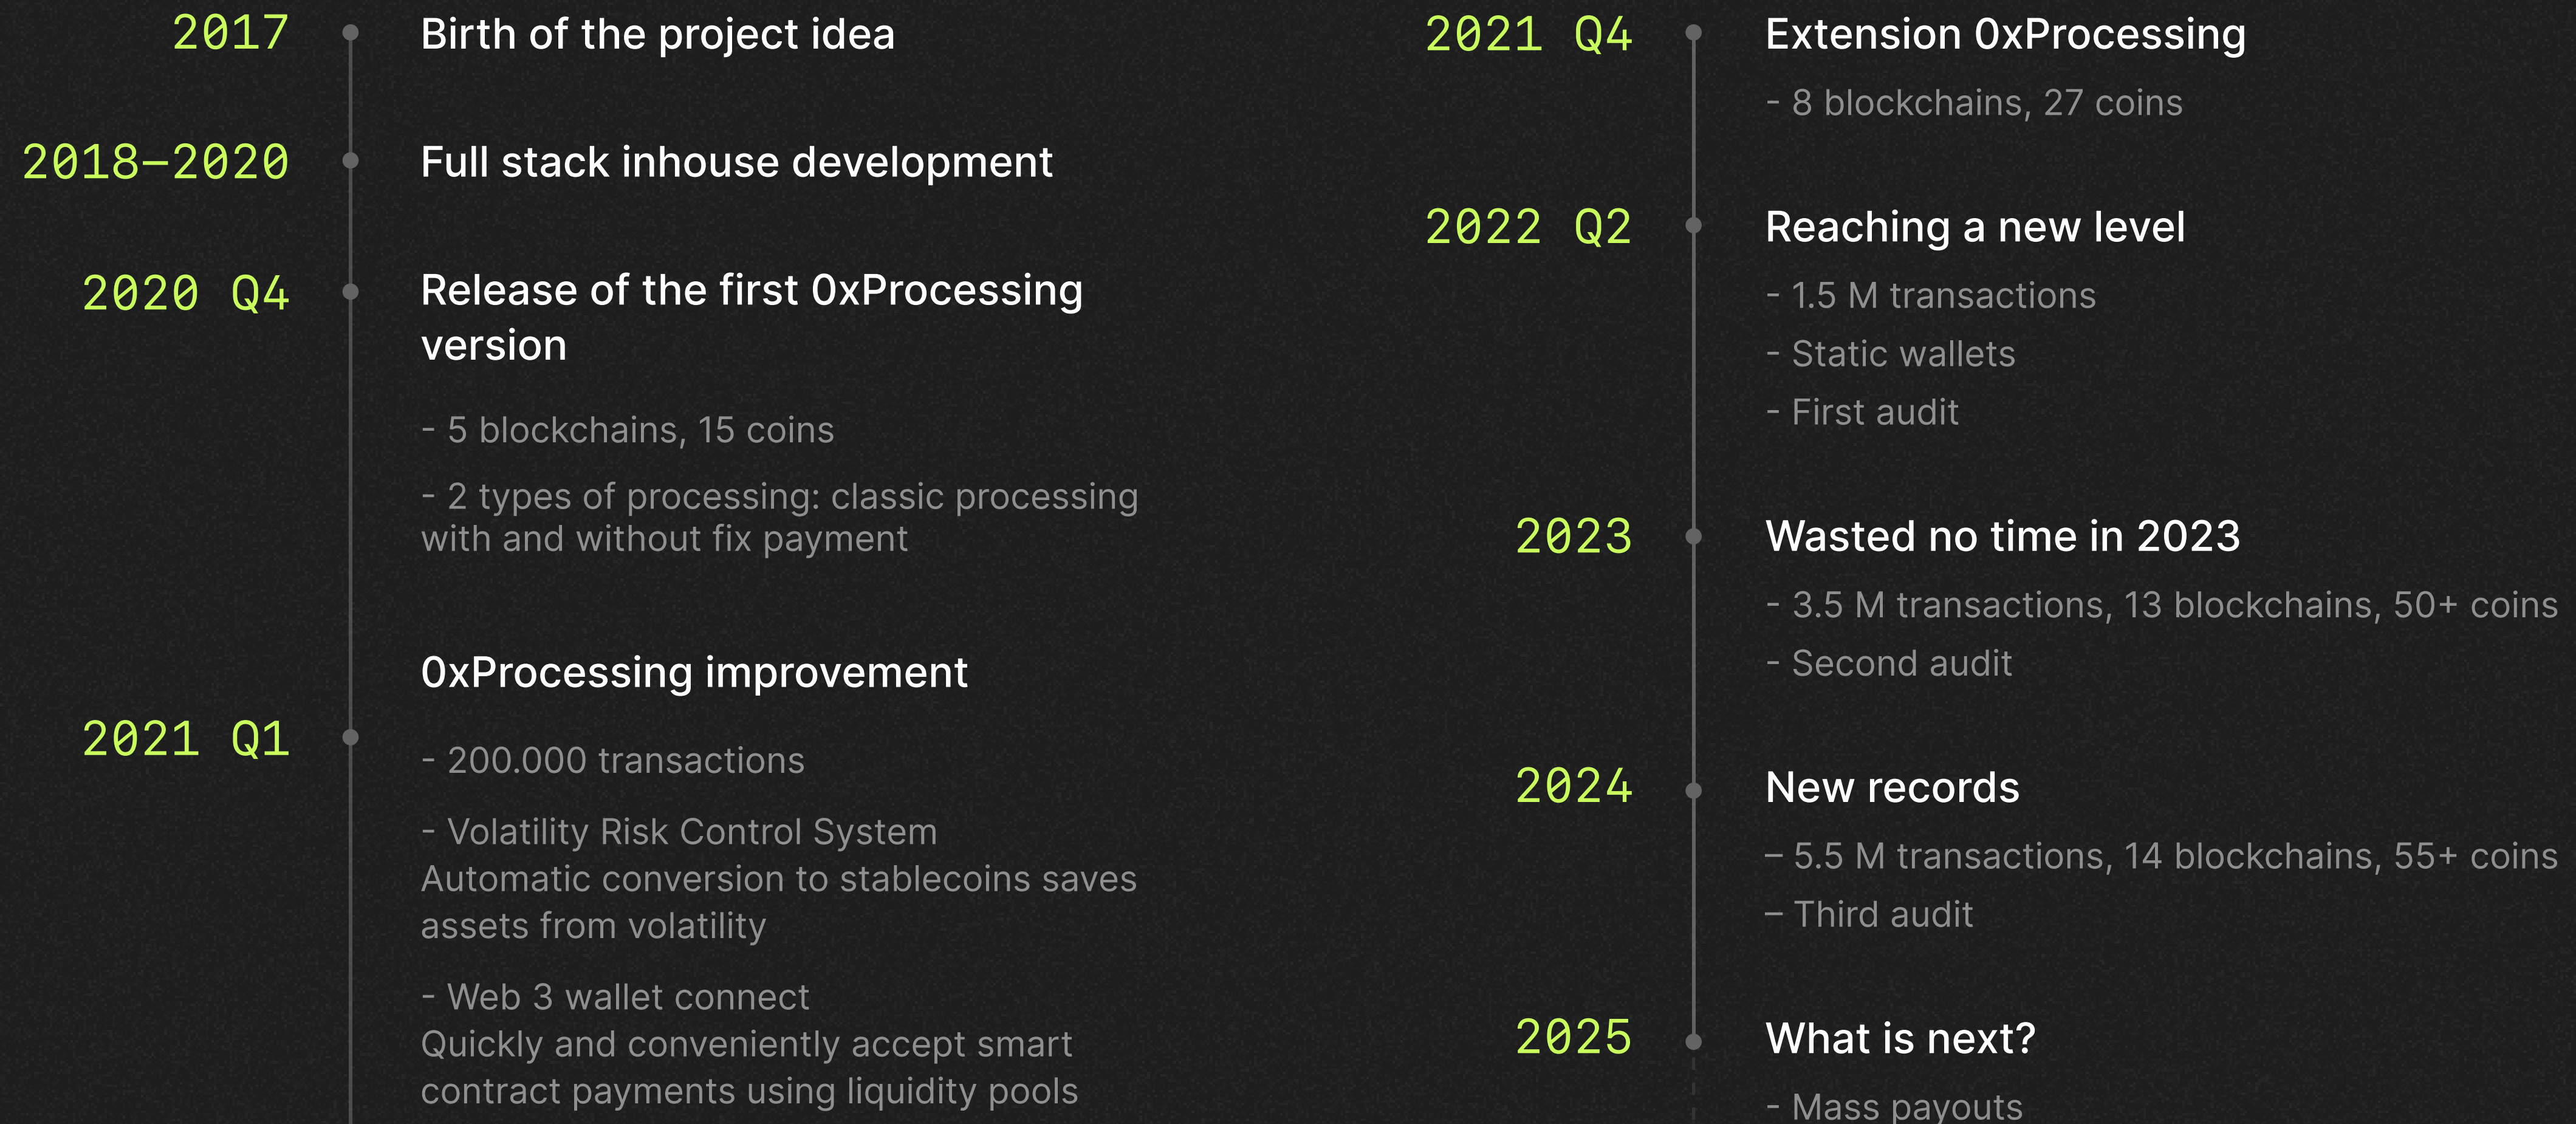

# For those who → play big

 OX processing

# Roadmap

# Ox Classic

FULLY CUSTOMIZABLE DESIGN

## Payments with fixed amount

The client gets access to a payment form with a fixed amount that you set

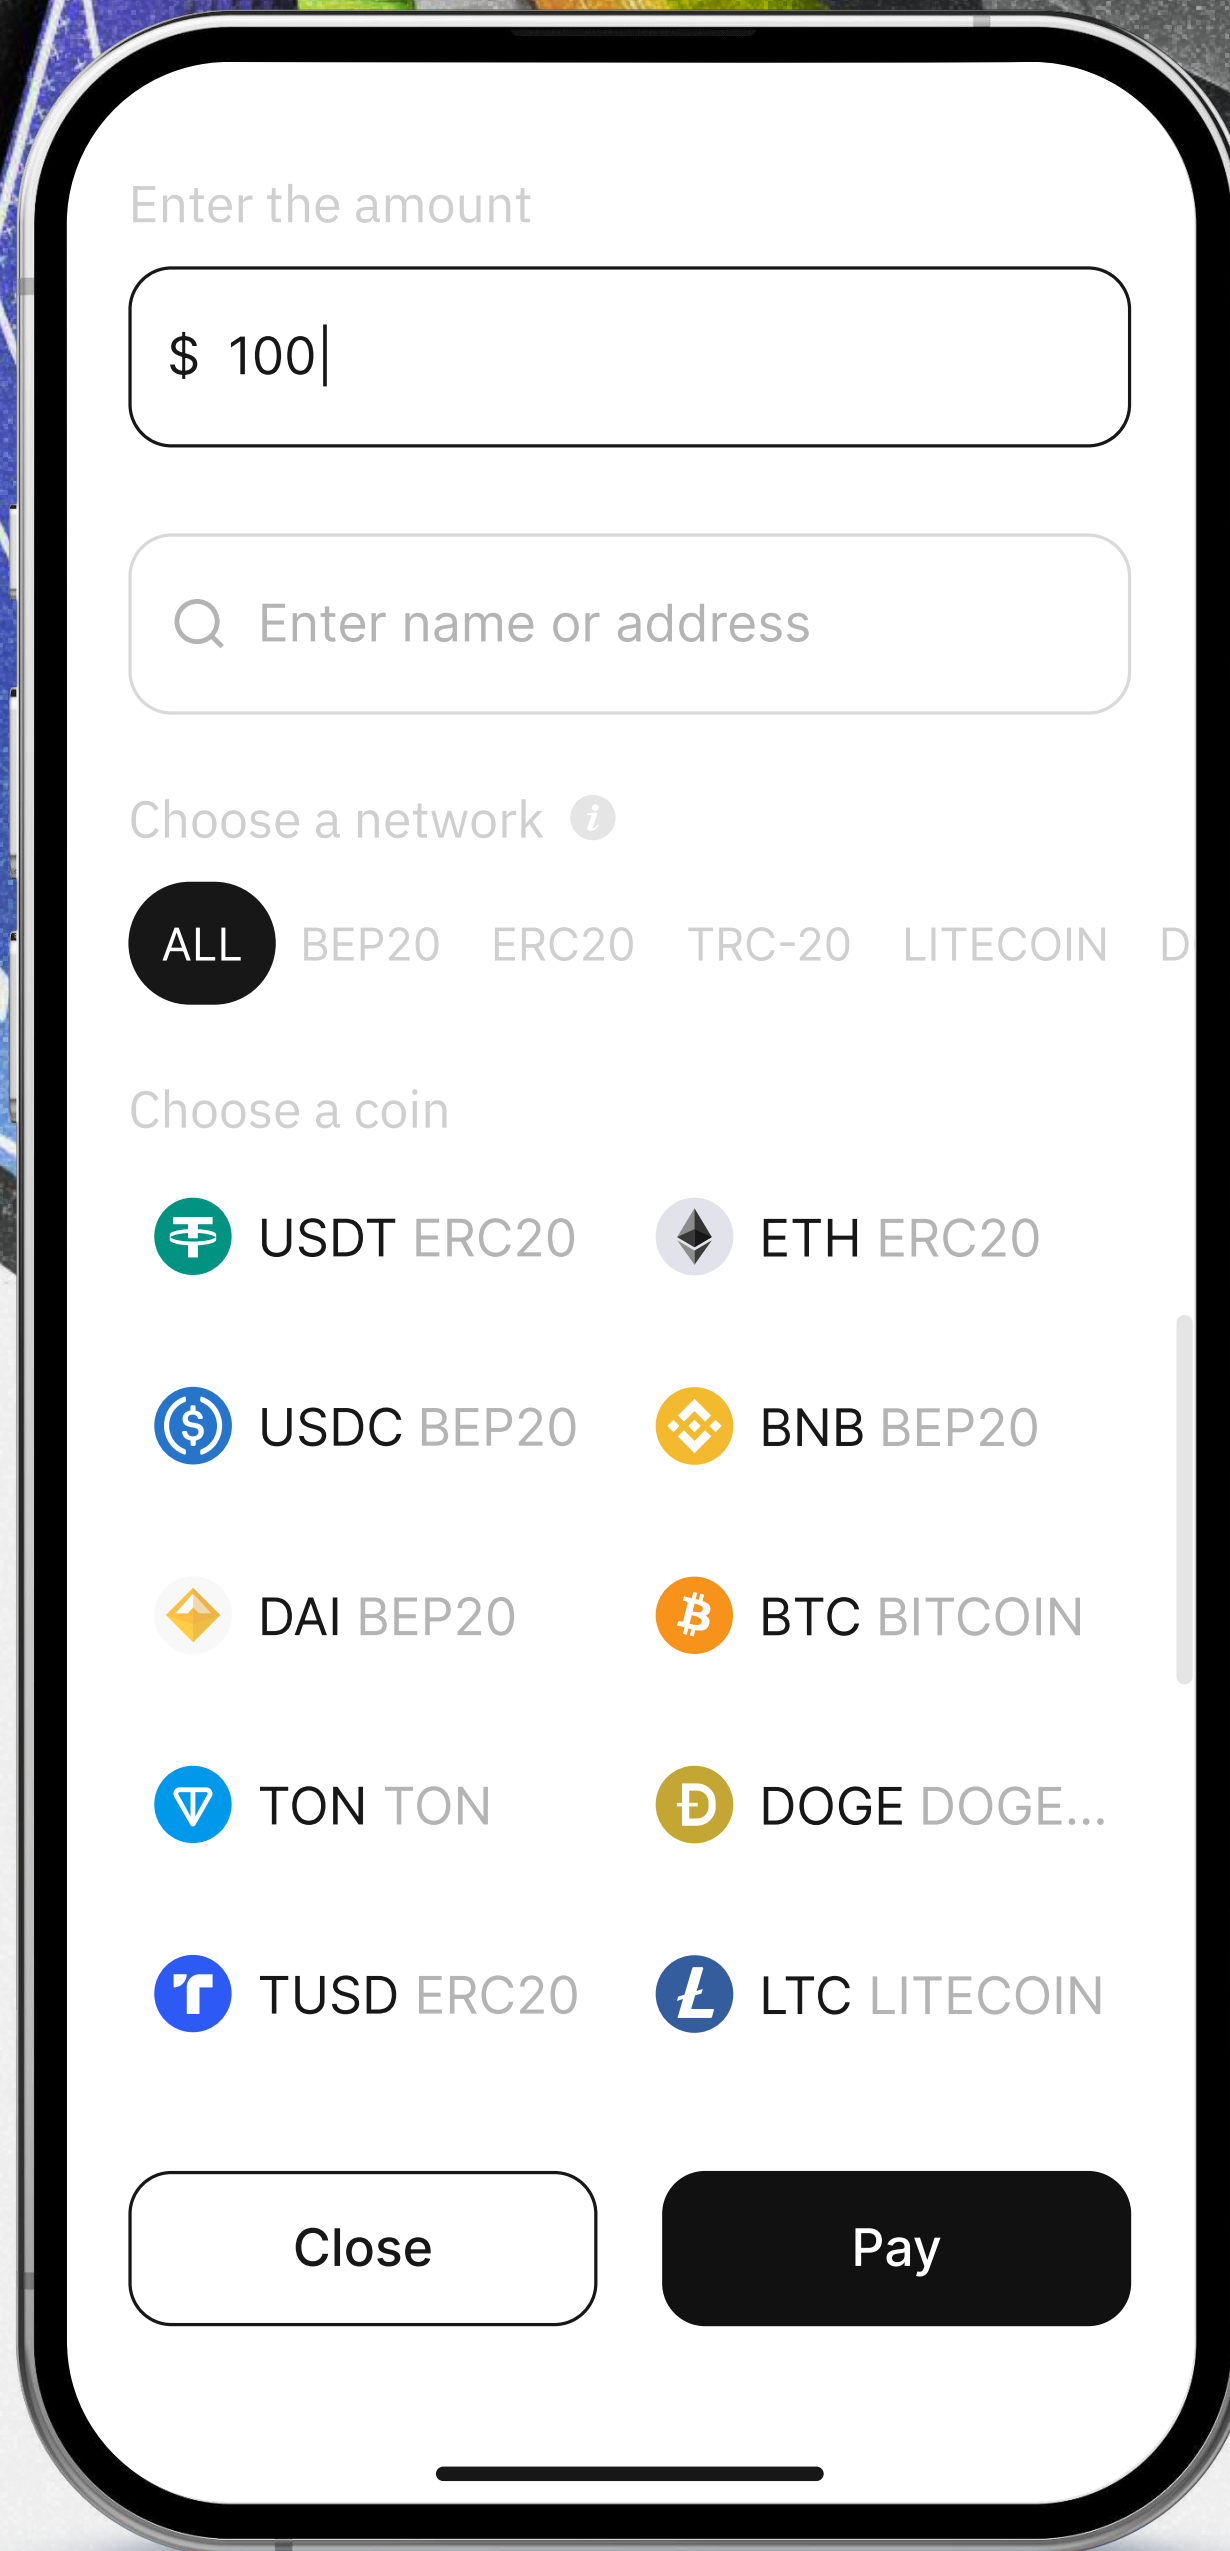

The payment amount can only be changed by you

## Payments without fixed amount (deposit method)

When paying without a fixed amount, the client can pay any amount at his/her discretion, but not less than the minimum amount

The minimum amount is set automatically

# Volatility Risk Control System

A system that helps overcome asset volatility by converting incoming payments into stablecoins

WORKS ONLY WITH 0x CLASSIC

Client's wallet

+ 0.013 BTC

+ 0.32 ETH

VRCS balance

1,300 USDT

Main balance

Your client makes a payment in cryptocurrency.  
You set an amount limit for the VRCS balance. 0x takes care of the rest

0xProcessing converts payment at the current CEX (Binance) exchange rate

⌚ Rates update every 30 seconds

Min amount - \$10

When the amount on your VRCS balance reaches the maximum, the funds are automatically transferred to your main balance

# We built our own infrastructure

0xProcessing doesn't rent software and doesn't depend on anyone. This approach protects your assets and data from third-party risks. Let's sum up the killer features of 0xProcessing:

## 0x Classic cryptoprocessing

Payments with and without fixed amount for different business objectives

+100.00 DOGE

+0.2910 BNB

+120.00 USDT

## Web 3.0

Smart-contracts and liquidity pools for convenient and transparent payments

## Static Wallet

Facilitate the process of making and receiving payments and create a static wallet

## Own blockchain infrastructure

We do not use third party providers' solutions

## VRCS

Protect merchant assets from volatility with an automated system for converting to stablecoins

VRCS balance

**\$539.00**

₹ 538.99 USDT

# Integration

SMOOTH AND EASY

All data for integration is in the merchant's personal account

By developers for developers.  
Smart and well thought-out integration system

 processing

## Merchant Management

Merchant ID: 6RnE0wKWn9

Classic processing Web3 Managers Static wallets

### General settings

# Commission.

## Step by step calculation

Let's look at the example of transaction fee calculation

Client transfers the payment to the merchant

OxProcessing charges a fee for processing the payment

The payment is converted to stablecoin via VRCS

OxProcessing does not charge a fee

OPTIONAL STEP

The payment is credited to the merchant's account

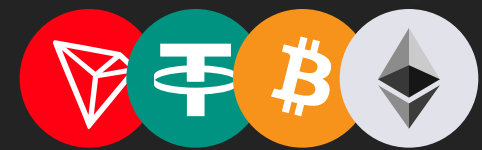

OxProcessing does not charge a fee

Merchant withdraws the payment to own crypto wallet with 0% withdrawal fee

# You can withdraw your funds in two ways

24/7 WITHDRAWAL

NO HOLD

0% withdrawal  
in cryptocurrency

Withdrawal to a bank account  
within 3-5 workdays

Withdrawal fee depends on the location of your bank account  
and assessed individually on request

Starting fee

Discount fee

Special fee

# How to start? 3 simple steps

01

**Fill out the form  
and share data  
about your business**

- Company name
- Website
- Email on the company's domain for merchant registration
- A detailed description of your business
- Public information from any online registry about the registration of your company
- The certificate of incorporation

02

**We will send you  
the invite to set up  
a merchant account**

- Log in to the account with the temporary data. Link is valid for 24 hours
- Change the password and set up 2FA

03

**Make an EASY-PEASY  
integration ✨**

**Welcome!**

Now you can  
earn money  
with 0xProcessing ↗

# Personal account

We worked through every pixel to made your experience exceptionally convenient.  
Made by people for people.

The dashboard features a sidebar with navigation options: Dashboard, Merchant, Statistics, Referrals, Settings, and Documentations. The main content area is divided into three sections: Statistics, Transactions, and a Total summary.

**Statistics**

Category	Status	Count	Amount
Successfully paid	Success	1,489	\$120,456.00
Payments in process	Pending	34	\$1,561.00
Not paid		2	\$112.00

**Transactions**

Here you can track the amount of deposits and withdrawals for the selected period. Mark the checkboxes to show or hide the charts.

Deposits  Withdrawals

The line chart shows a peak of \$11,200.00 on 12 July. The Y-axis ranges from 0 to 16,000.

**Total**

\$120,628.00

**Callouts:**

- Convenient and clear personal account interface
- Thoughtful UX, UI
- Transparent transaction analytics
